

Robert E. Feeney

List of Publications

1. Strong, F.M., R.E. Feeney, Barbara Moore and Helen T. Parsons. Jan. 1941. The riboflavin content of blood and urine. *The Journal of Biological Chemistry* 137(1):363-372.
2. Strong, F.M., R.E. Feeney and Ann Earle. Aug. 1941. Microbiological assay for pantothenic acid. *Industrial and Engineering Chemistry, Analytical Edition* 13(8):566-570.
3. Feeney, R.E., and F.M. Strong. Feb. 1942. The concentration of the substance in blood which is stimulatory for *Lactobacillus casei epsilon*. *The Journal of Biological Chemistry* 142(2):961-962.
4. Feeney, R.E., and F.M. Strong. April 1942. Growth stimulating substances for *Lactobacillus casei*. *Journal of the American Chemical Society* 64(4):881-884.
5. Feeney, Robert E., J. Howard Mueller and Pauline A. Miller. Dec. 1943. Growth requirements of *Clostridium tetani*. II. Factors exhausted by growth of the organism. *Journal of Bacteriology* 46(6):559-562.
6. Feeney, Robert E., J. Howard Mueller and Pauline A. Miller. Dec. 1943. Growth requirements of *Clostridium tetani*. III. A "synthetic" medium. *Journal of Bacteriology* 46(6):563-571.
7. Feeney, Robert E. June 1947. Wound bacteriology in the Philippines. *The Military Surgeon* 100(6):514-518.
8. Feeney, Robert E. July 1947. The isolation and identification of *Clostridia* in the field. *The Military Surgeon* 101(1):50-56.
9. Lewis, J.C., R.E. Feeney, J.A. Garibaldi, H.D. Michener, D.J. Hirschmann, D.H. Traufler, A.F. Langlykke, H.D. Lightbody, J.J. Stubbs and H. Humfeld. Aug. 1947. Subtilin production in surface cultures. *Archives of Biochemistry* 14(3):415-425.
10. Stubbs, J.J., R.E. Feeney, J.C. Lewis, I.C. Feustel, H.D. Lightbody and J.A. Garibaldi. Aug. 1947. Subtilin production in submerged culture. *Archives of Biochemistry* 14(3):427-435.
11. Feeney, R.E., H.D. Lightbody and J.A. Garibaldi. Oct. 1947. Zinc as an essential element for growth and subtilin formation by *Bacillus subtilis*. *Archives of Biochemistry* 15(1):13-17.
12. Feeney, R.E., J.A. Garibaldi and E.M. Humphreys. June 1948. Nutritional studies on subtilin formation by *Bacillus subtilis*. *Archives of Biochemistry* 17(3):435-445.
13. Feeney, Robert E., and John A. Garibaldi. June 1948. Studies on the mineral nutrition of the subtilin-producing strain of *Bacillus subtilis*. *Archives of Biochemistry* 17(3):447-458.
14. Garibaldi, John A., and Robert E. Feeney. Feb. 1949. Subtilin production. *Industrial and Engineering Chemistry* 41(2):432-435.
15. MacDonnell, L.R., H.L. Hanson, R.B. Silva, Hans Lineweaver and R.E. Feeney. Feb. 1950. Shear - not pressure - harms egg white. *Food Industries* 22(2):273-276.

16. Fraenkel-Conrat, Heinz, and Robert E. Feeney. Nov. 1950. The metal-binding activity of conalbumin. *Archives of Biochemistry* 29(1):101-113.
17. Lineweaver, Hans, and Robert E. Feeney. 1951. Improving frozen and dried eggs. p.642-647, IN: **Yearbook of Agriculture, 1950-1951**, United States Department of Agriculture, Washington, DC.
18. MacDonnell, L.R., R.B. Silva and R.E. Feeney. July 1951. The sulphydryl groups of ovalbumin. *Archives of Biochemistry and Biophysics* 32(2):288-299.
19. Kline, Leo, Helen L. Hanson, T.T. Sonoda, Joan E. Gegg, R.E. Feeney and H. Lineweaver. Aug. 1951. Role of glucose in the storage deterioration of whole egg powder. III. Effect of glucose removal before drying on organoleptic, baking and chemical changes. *Food Technology* 5(8):323-331.
20. Feeney, R.E., R.B. Silva and L.R. MacDonnell. Sept. 1951. Chemistry of shell egg deterioration: The deterioration of separated components. *Poultry Science* 30(5):645-650.
21. MacDonnell, L.R., H. Lineweaver and R.E. Feeney. Nov. 1951. Chemistry of shell egg deterioration: Effect of reducing agents. *Poultry Science* 30(6):856-863.
22. Feeney, Robert E. Nov. 1951. The antagonistic activities of conalbumin and 8-hydroxyquinoline (oxine). *Archives of Biochemistry and Biophysics* 34(1):196-208.
23. Feeney, R.E., E.D. Ducay, R.B. Silva and L.R. MacDonnell. July 1952. Chemistry of shell egg deterioration: The egg white proteins. *Poultry Science* 31(4):639-647.
24. Feeney, Robert E., and David A. Nagy. Nov. 1952. The antibacterial activity of the egg white protein conalbumin. *Journal of Bacteriology* 64(5):629-643.
25. MacDonnell, L.R., E.D. Ducay, T.F. Sugihara and R.E. Feeney. 1954. Proteins of chicken, duck, and turkey egg white. *Biochimica et Biophysica Acta* 13:140.
26. Feeney, Robert E., L.R. MacDonnell and Heinz Fraenkel-Conrat. Jan. 1954. Effects of crototoxin (Lecithinase A) on egg yolk and yolk constituents. *Archives of Biochemistry and Biophysics* 48(1):130-140.
27. Feeney, Robert E., L.R. MacDonnell and F.W. Lorenz. May 1954. High temperature treatment of shell eggs. *Food Technology* 8(5):242-245.
28. Sugihara, T.F., L.R. MacDonnell, C.A. Knight and R.E. Feeney. 1955. Virus antihemagglutinin activities of avian egg components. *Biochimica et Biophysica Acta* 16:404-409.
- 28a. Feeney, Robert E. Feb. 1955. The properties of eggs in relation to baking and pre-mixes. *Bakers Digest* 29(1):1-4.
29. MacDonnell, L.R., R.E. Feeney, H.L. Hanson, Agnes Campbell and T.F. Sugihara. Feb. 1955. The functional properties of the egg white proteins. *Food Technology* 9(2):49-53.
30. Feeney, Robert E., Leonard R. MacDonnell and Eufemio D. Ducay. March 1956. Irreversible inactivation of lysozyme by copper. *Archives of Biochemistry and Biophysics* 61(1):72-83.
31. Feeney, Robert E., John M. Weaver, Joan R. Jones and Marvin B. Rhodes. Sept. 1956. Studies of the kinetics and mechanisms of yolk deterioration in shell eggs. *Poultry Science* 35(5):1061-1066.

32. Feeney, Robert E., Inez M. Petersen and Huseyin Sahinkaya. Feb. 1957. "Liesegang-like" rings of growth and inhibition of bacteria in agar caused by metal ions and chelating agents. *Journal of Bacteriology* 73(2):284-290.
33. Rhodes, Marvin B., Robert M. Hill and Robert E. Feeney. March 1957. Spectrophotometric determination of trypsin and trypsin inhibitors. *Analytical Chemistry* 29(3):376-378.
34. Rhodes, Marvin B., and Robert E. Feeney. July 1957. Mechanisms of shell egg deterioration: Comparisons of chicken and duck eggs. *Poultry Science* 36(4):891-897.
35. Feeney, Robert E., and Nelle Bennett. Nov. 1957. Formation of Liesegang-like rings by metal ions and chelating or complexing agents. *Nature* 180:979-980.
36. Rhodes, Marvin B., Parviz R. Azari and Robert E. Feeney. Jan. 1958. Analysis, fractionation and purification of egg white protein with cellulose-cation exchanger. *The Journal of Biological Chemistry* 230(1):399-408.
37. Azari, Parviz R., and Robert E. Feeney. May 1958. Resistance of metal complexes of conalbumin and transferrin to proteolysis and to thermal denaturation. *The Journal of Biological Chemistry* 232(1):293-302.
38. Rhodes, Marvin B., Robert E. Feeney and O. Neal Miller. 1959. Fractions with high activity for intrinsic factor and combining vitamin B₁₂ with receptor substances. *Proceedings of the Society for Experimental Biology and Medicine* 101:70-73.
